Wild Flower Gardening...

"... I cannot imagine a more delightful and absorbing pastime than studying nature's way with plants and using the knowledge thus acquired to create gardens — new kinds of gardens, that will follow her teachings, and reflect something of her charm and beauty.

Nature shows no partiality. Whenever there is bare ground she plants a garden. She cares not whether the soil is rich or poor, moist or dry, in dense shade or full sun, sheltered or fully exposed to wind and storm. Everywhere she grows plants—beautiful plants—that flourish and increase and become pleasing features of the landscape."

Why don't you establish a wild flower garden at your home; you will find it a constant source of interest and pleasure.

Conserve, Protect, and Enjoy, . . .

All orders accepted subject to prior sale.

All Shipments will be Accompanied with a
Certificate of Inspection

Northern Grown . . .

AZALEAS and RHODODENDRONS

For a number of years we have been growing Azaleas and Rhododendrons for the local trade and have decided this year to make them available to all.

These plants are grown under out-of-door conditions and have withstood a temperature of ten degrees below zero.
